

## P/N 33514

Diaphragm pump series APPB-12 in polypropylene and aluminum with suction tube in stainless steel for drums 180÷220 kg

### AREAS OF USE

Aeronautics, Agriculture, Automotive, Building and road construction, Chemical industry, Lube trucks and transports, Shipping and offshore, Railway transport

### FEATURES

|  |  |
|--|--|
| Flow rate                                  | 50 l/min                                 |
| Ratio                                      | 1:1                                      |
| Compatible fluids                          | antifreeze and windshield washing liquid |
| Internal flanges and motor engine material | aluminum                                 |
| Wetted parts                               | polypropylene                            |
| Ball valve material                        | Teflon®                                  |
| Air inlet connection                       | G 3/8" (f)                               |
| Fluid inlet-outlet connection              | G 3/4" (f) x G 1/2" (f)                  |
| Working pressure                           | 2 ÷ 6 bar                                |
| Max supply pressure                        | 8 bar                                    |
| Average air consumption                    | 400 l/min                                |
| Noise level                                | 75 dB                                    |
| Fluid temperature                          | -10 ÷ +65 °C                             |
| Max size pumpable solids                   | ø 1,5 mm                                 |
| Suction-delivery ball valve with spring    | cylindrical ball valve with spring       |
| Bung adaptor                               | p/n 33434                                |

### OVERALL DIMENSIONS (mm)

|              |                  |
|--------------|------------------|
| Suction tube | 940 mm - ø 34 mm |
| Packing      | 2 - 0,034        |
| Weight       | 12,45 kg         |
